SUBJ: Air Pollution Control Permit
Former Hexcel Corporation Facility, Lodi, New Jersey
Log No. 01-96-1867
Stack Designation GWT-1
GEO Project No. 94039T2

Dear Mr. Gudz:

This letter serves as notification that the ground water treatment system pilot test at the subject location began October 10, 1996. Accordingly, it is our understanding that the subject air permit is valid for 90 days thereafter or through January 8, 1997. We understand the temporary air permit issued under cover of your August 2, 1996 letter is valid for 90 days (as we requested in the permit application) from the start of the pilot test. The start date for this pilot test was not defined in the permit application. Therefore, a permit termination date could not be defined. We stated in the permit application transmittal letter (April 2, 1996) that it was necessary to coordinate other approvals, in addition to the air pollution control permit, before starting the pilot test. If we do not hear otherwise from you, we will assume you are in agreement with this permit termination date.

The pilot test is discontinuous. We do not expect to operate either the ground water pumping or the water treatment equipment continuously throughout this 90-day period. If you or other state personnel want to visit the site during the pilot test, please notify us ahead of time so we can tell you if we will be operating.

If you have any questions, please contact either of the undersigned. Thank you for your cooperation in this matter.

Sincerely,

GEO ENGINEERING, INC.

Jeffrey E. Duncan, P.E.
